# ABOUT EFFY

## ***BIOGRAPHY***

When they started raving in 1993, Effy Heartbreak fell in love with dance music and how it uplifts and brings people together. Since then, they have gone by many names and even quit producing music for a decade but never stopped loving the scene. Getting involved in the Twitch DJ scene during the pandemic, Effy fell back in love with the creative process and rediscovered DJing and producing. While leaning heavily on house, tech house, and breaks, they produce a wide range of dance genres. Effy is proud to be a queer musician. They do not use generative AI in their work. Effy's pronouns are they/them.

## ***SKEETABLE/TWEETABLE BIO (95 CHARACTERS)***

Raver since 1993. Multi-genre dance music producer. Proud queer musician. No gen-AI. They/them.

## ***INFLUENCES***

Effy Heartbreak's influences range from John Summit to Omar Santana; from John Digweed to Force & Styles. They draw from progressive house, breakcore, and acid jazz, applying the complexity and musicality of these genres to a more loop-contained structure. Effy is greatly inspired by the work of queer and non-male artists and brings the same unique insight into their own work.

## ***GEAR***

Effy uses Ableton Live, Vital Synth, Native Instruments, Loopcloud, and M-Audio, along with numerous VST plugins. They use a Pioneer controller for DJing.

# COMING SOON

**DEBUT ALBUM (TITLE TBD) COMING 2025**  
**ACID TECH, BREAKS, HARDCORE, AND MORE!**
